

**FAIRFAX COUNTY FIRE AND RESCUE DEPARTMENT**  
**BASIC TRAINING SECTION**

**MOTOROLA XTL/XTS5000  
MOBILE & PORTABLE RADIOS**

## REFERENCES

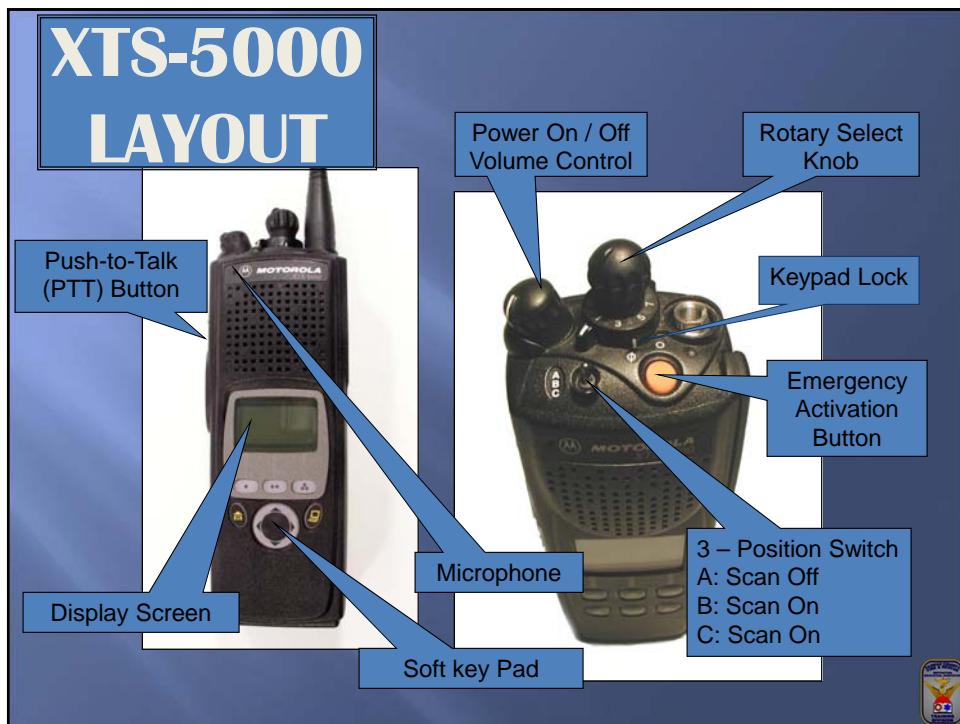

- NFPA 1001 Standard for Fire Fighter Professional Qualifications
- Fairfax County FRD Communications Manual rev July 2012
- NOVA Procedural Bulletin 2008-002 Emergency Activation (EA) Button
- Motorola ASTRO XTS 5000 User Guide

## CLASS GOALS

- Demonstrate the proper method of operating a portable radio.
- Understand the proper method of operating a mobile radio.

# ICONS

	<b>Battery Status</b>	Flashes when Battery is Low.
	<b>Call Received</b>	Indicates receipt of a Private Call or Page / Call alert
	<b>Scan</b>	Indicates radio is scanning.
	<b>Program</b>	Radio is in View Program state.
	<b>Direct / Talkaround</b>	Indicates radio is in Direct / Talkaround mode and not receiving system communication.

## INSTALL/REMOVE ANTENNA

- Screw the antenna into the antenna receptacle on top the radio.
- Tighten the antenna firmly with your fingers.

## INSTALL/REMOVE BATTERY

Note: The battery must be charged before use.  
Memory effect is a phenomenon that causes a loss in battery capacity or voltage due to repetitive shallow discharging or long – term overcharging.

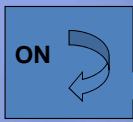

## HANDMIKE

- Handmike allows for placing microphone closer to user
- In fire incidents the cord has burned through

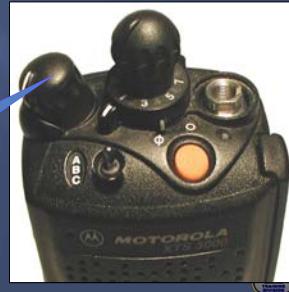

## TURN RADIO ON / OFF

1. Turn the radio on by rotating the On / Off / Volume Control Knob clockwise.
2. Turn the radio off by rotating the On / Off Volume Control Knob counterclockwise until you hear a "click."

## SET VOLUME

1. Turn the On / Off / Volume Control Knob clockwise to increase volume, counterclockwise to decrease volume.

# SELECT A ZONE

1. Press the key below ZONE. The current zone name "4" flashes on the display.
2. Press the arrow keys until the desired zone name appears on the display.
3. Press the HOME button to lock in the displayed zone.
4. Pressing the HOME button for 2 seconds will return you to 4A DISP
5. Go back to 46D2. Now turn the channel to 46A and 46P.

## **OTHER ZONES**

- Zone 41-second/alternate primary
- Zone 42-Special Ops
- Zone 43-MI channels
- Zone 44-Coordination
- Zone 45-Prevention
- Zone 46-Training
- Zone 47-Fairfax City
- Zone 48-Back-up zone
- Zone 49-Hospitals

## **MUTUAL AID ZONES**

- Zone 1 - Arlington County
- Zone 1A1 –Arlington County Second Zone
- Zone 2 - Alexandria City
- Zone 3 - MWAA
- Zone 5 - Prince William County
- Zone T1 - Manassas City
- Zone T9 – Manassas Park
- Zone 6 - Loudoun County
- Zone 7 - Montgomery County
- Zone 71 – Montgomery County Second Zone
- Zone CFEMAIN – Charles County

# SELECT A CHANNEL

Rotary Select Knob

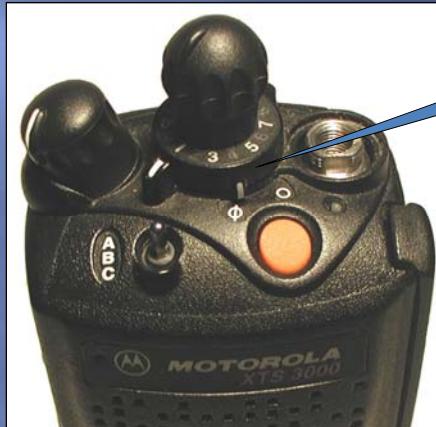

Once you have the desired zone displayed, rotate the 16 – position Rotary Select Knob to the desired talkgroup. The new channel name will appear on the display.

# KEYPAD LOCK

Keypad Lock

Rotate the switch to enable the keypad lock. When the line is pointing to the O the keypad is unlocked, the O with the line through it is keypad locked.

# TRANSMIT/RECEIVE

1. Turn the radio on and select the desired zone and mode. The selected channel appears in the display.
2. Listen for ongoing conversations: if channel becomes available, proceed with your call.
3. Press the PTT button to transmit and wait for the talk permit tone. When speaking, keep the microphone 1-2" from your mouth and speak in a normal tone. (If you hear a busy signal, wait for a call back tone, then proceed with your call.)
4. Release PTT button to listen.

Transmit=Press & Hold PTT switch  
Receive=Release PTT switch

User Actions	Radio System Results
Turn radio on	<Associate to Talkgroup>
Press PTT	<Request Freq. for Tx> <Assigns available Freq.>
	<Sends control message to all associated users to monitor assigned Freq.>
	<Sends you an "OK to talk" Signal> OR
Start Talking	<Sends you a "Busy" Signal> <Sends you signal indicating System Available>
Release PTT	OR <Sends you an "Out of Range" Signal>
Relocate to area of coverage and Press PTT again	

## SCAN ON / OFF

### 3-Position Switch

- A. Scan Off
- B. Scan On
- C. Scan On

1. Place the 3- position Switch to the B or C position to enable Scan. The Scan icon  will appear indicating Scan is active.
2. Place the 3-Position Switch to the A position to disengage Scan. The Scan icon will disappear indicating Scan no longer active.
3. While scanning, the radio will use the selected channel as the scan priority, and the default transmit channel.
4. Model II radios will only scan while on channel A or B and I.

## ALERT TONES

### Alert tones

### Causes

Single, low-pitched tone

Indicates invalid key press or radio self –test fail. Also out of range, in programming mode to long- generally an error tone.

Continuous low-pitched tone when pressing the PTT button

Indicates you are out of range, or system is out of service, or talk prohibit.

Short, medium-pitched tone

Exiting emergency state.

Continuous medium-pitched tone

Indicates activating emergency button or receiving page.

Short, high-pitched tone or "chirp"

Low battery.

# LED INDICATORS

LED	Description
<b>With PTT pressed (transmitting):</b>	
<b>Continuous red</b>	<b>Normal transmission</b>
<b>Unlit</b>	<b>Not transmitting</b>
<b>With PTT released (receiving):</b>	
<b>Blinking green</b>	<b>Private call or page has been received</b>

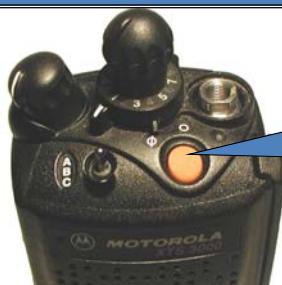

# TROUBLESHOOTING CHART

Symptom	Possible Cause/Solution
Doesn't turn on	Check that your battery is charged and connected properly.
Busy signal	You cannot transmit because all system channels are busy. Release the PTT button and wait for call back tone. (same as talk permit, must transmit within 3 seconds to "grab" channel).
Cannot transmit or receive	<p>Be sure the radio is turned on and the 16-position Select Knob is turned to the correct channel.</p> <p>Replace or recharge the battery. The first time a new battery is used, it should charge a minimum of 16 hours.</p> <p>The antenna must be screwed on properly, with its base flush against the top of the radio.</p> <p>Check your accessories i.e. public safety microphone or ear piece for improper connections.</p> <p>Try operating the radio from several different locations, especially when using the radio inside buildings.</p> <p>Check the transmitter by transmitting with an alternate portable radio from the same location.</p>

## EMERGENCY ACTIVATION BUTTON

EMERGENCY  
ACTIVATION  
BUTTON

1. To initiate an alarm, press and hold the Emergency Activation (EA) button.
2. Do Not turn the rotary knob once the EA button has been activated.  
Turning the knob will activate an Emergency on every channel the knob is turned to. The emergency activation will also activate on other Jurisdictions Radio Zones, depending on the Zone the radio is set on.
3. To cancel an alarm, press and hold the EA button until you hear a continuous exit tone.

## EMERGENCY ACTIVATION

- Accidental Activation of the EA Button
- When Not to Use the EA Button
  - Talk around channels (4N/4O)
  - Failsoft

## "MAYDAY"

- Reporting a lost or trapped firefighter or team of firefighters during any working incidents
- Limited to only those rare occasions when a firefighter's life is known, or perceived to be in danger, and immediate notification to the incident commander is essential in order to initiate an action plan or deploy the rapid intervention team
- Once the phrase "MAYDAY" is announced, all other radio traffic shall cease

## "PRIORITY TRAFFIC"

- Request (DPSC) to grant immediate access to a radio channel to report a significant event
- Reporting a significant event
- When something of significance occurs, on an incident, that severely affects standard operations (e.g., losing a water supply, burst hose, locating victim or fire)

## SIGNAL CODE

- SIGNAL 1 - Responder in immediate danger.
- SIGNAL 2: Responder needs assistance/back-up
- SIGNAL 3: Responder is taking or anticipates taking subject into custody (for FM use).
- SIGNAL 4: Responder/Dispatcher needs to convey sensitive, confidential, or safety information.

## RADIO SYSTEM COMPLICATIONS

- MANUAL MODE
- FAILSOFT
- Other Events:
  - SITE TRUNKING/TOWER SITE OUTAGE
  - POWER FAILURE AT DPSC
  - CATASTROPHIC EMERGENCY AT DPSC

## **BACKUP RADIO ZONE**

- Zone 48 is the Backup zone.
- There are some limitations to this system and they are:

If we lose our radio system for any reason the UFOD will make the decision to have all units switch over to the Backup Radio System.

## **MOBILE RADIO**

- Much stronger signal
- Basic functions identical
- Layout of keys is main difference

# **BEWARE THE OPEN MIKE!!!!**

## **REVIEW**

- 1) Which button is the EA button?**
- 2) What are two methods to transmit with the portable radio?**
- 3) If you receive an “Out of Range” tone and display on your radio, what should you do?**
- 4) How do you lock the keypad?**
- 5) No matter what zone you are operating in, how can you get back to 4A?**
- 6) What is the Zone 48 utilized for?**
- 7) What does “Day Mode” refer to?**
- 8) What is “Signal 1”?**

## SUMMARY

- Understanding the operation of your portable radio may save your life and the lives of your fellow fire fighters.
- The ability to change channels and zones while en route to calls, as well as while operating on the emergency is critical.
- Continual practice and training must continue to ensure your proficiency.
